Re: Kohchise Jackson

DOB 

To Whom It May Concern:

Patient was seen 1/10/2017 post operatively for a Hartman's procedure for colovesical fistula secondary to complicated sigmoid diverticulitis. My recommendation and standard of care for this patient is to have a Barium Enema x-ray via the distal rectal stump and a colostomy reversal. Please see attached office note.

If you have any further questions, please call our office.

Sincerely,

Erina Kansakar, M.D.
